Mobile access for critical functions now available!

Remote Control:

Access for your administrators or for all employees

- TS Access Built-In
- Secure, Encrypted VNC Built-In
- Supports Radmin
- Supports PCAnywhere

Secure FTP to any node!
Admin chat built in!

Inventory:

Instant access to complete software and hardware inventory.

- Vendor integration for support information with HP, Dell, IBM, and Lenovo is built in!
- Track both software and hardware changes!

Patch Management:

Fully automatic control of your Microsoft patches. Easy installation for all others.

- Complete control of patches, including the ability to customize the installation of each package beyond the options provided by Microsoft
- Full, detailed reporting of all patch status
- Easy patch deployment for new workstations

Easy, Gui-Driven Scripting:

The scripting interface is command central for almost all tasks that can be performed on a remotely managed node. Provides the ability to perform any function that can be done in the operating system of the managed node remotely, individually or "en mass".

Software installation:

Install any application remotely, regardless of the location of the managed node.

Secure Vizion's

ManageIT services can be configured to:

- Completely manage your IT infrastructure for businesses with no internal IT personnel
- Improve visibility, productivity and flexibility for businesses with on staff IT personnel
- Provide a competitive edge for independent IT professionals supporting multiple customers, with complete access to enterprise class tools and resources

Full Ticketing System:

User accessible full ticketing system with robust SLA management. E-mail reader, user portal, and highly filterable ticketing system with basic knowledgebase capabilities built in!

Monitoring and Alerting:

Alert to admin console or email. Monitor any counter, any event log (timestamp, search, and archive them too!), any process, any service, or any port. Simple and customizable. Take automated action for detected alarms!

Includes SNMP control and syslog parsing for non-windows devices

Reporting:

On demand customizable reporting for every aspect and action related to your network! Reports, even customized reports, can be delivered as scheduled.

We Also Provide...

Email Archiving for regulatory compliance, **Email filtering** for viruses, content and spam, **Web Filtering** and logging, and **IM Filtering** and logging. Our gateway security services are fully redundant with **99.99% reliability**, secure, and user accessible!
